**2025 Registered Nursing and Midwifery  
Graduate Program**

Hospital and Health Service Facilities

**Queensland  
Government**

# Purpose

This document is produced to help potential applicants to the 2025 Registered Nursing and Midwifery Graduate Program select work location preferences.

The following pages contains two lists for both registered nursing and midwifery. Each list contains facilities (hospitals and other places of health care delivery) that Hospital and Health Services (HHS) plan to place graduate program positions. The list also includes specialty areas in which graduates may be placed at the facility and the Modified Monash Model (MMM) classification to define whether the location is metropolitan, rural, remote or very remote. The MMM classification relates to rural and remote incentives.

MMM	MMM Description
1	Metropolitan
2	Regional centre
3	Large rural town
4	Medium rural town
5	Small rural town
6	Remote community
7	Very remote community

It is important to note:

- The lists are not a complete list of HHS facilities, the lists focus on where graduate positions are likely to be placed in the 2025 graduate program year, and
- As HHSs operate in complex environments, current plans are subject to change based on local operational needs.

When applying for a graduate program position, you will be required to indicate your HHS preference (or preferences) and nominate at least one facility preference.

If you have any questions in relation to specific facilities, please contact the relevant HHS. HHS contact details are available on the Nursing and Midwifery graduate program website: <https://www.gradnursesmidwives.health.qld.gov.au/hhs-contact-details>.

## 2025 Midwifery Graduate Program Facilities and Options

### Midwifery Options

**A** = Group practice or continuity of midwifery care model

**B** = Rotational shifts across all areas of midwifery practice

**C** = Work in one specific area of midwifery practice (e.g. postnatal ward)
